1. Changelog

1.1 Service Access Limitation Changelog

v1.0.0 (2017-02-06)

- First release.

v1.1.0 (2020-10-01)

- Updated CSS and HTML code to match firmware 6.2.0+.

2. Description of the module

Router app *Service Access Limitation* is not contained in the standard router firmware. Uploading of this router app is described in the Configuration manual (see Chapter [Related Documents](#)).

Service Access Limitation is used for simple service access management. You're be able to limit access to a service per interface in it's GUI.

3. Installation

Like every other Router App, the Service Access Limitation is installed in *Router Apps* section in the router configuration page. Once the installation of the app is complete, the app is listed among other installed modules, it contains GUI with Status and Configuration section.

Figure 1: Router Apps

4. How to use

4.1 Status

This section showcases if the *Service Access Limitation* is currently operating. The status of router app is determined whether you *Enable/Disable rules* in the configuration section.

Figure 2: Status Overview

4.2 Configuration

You can configure which of your router's interfaces will be operating with each service chosen by you.

The configuration table is titled "Configuration" and includes a checkbox for "Enable rules" which is checked. It features a grid of checkboxes for various services across multiple interfaces. All checkboxes in the grid are checked. An "Apply" button is located at the bottom of the table.

Configuration
