1. Changelog

1.1 Samba Changelog

v1.0.0 (2019-12-13)

- First release.

v1.1.0 (2020-10-01)

- Updated CSS and HTML code to match firmware 6.2.0+.

v1.2.0 (2022-11-03)

- Reworked license information.

v1.3.0 (2023-02-15)

- Updated to version 4.17.5.

2. Description of the module

Router app is not contained in the standard router firmware. Uploading of this router app is described in the Configuration manual (see Chapter [Related Documents](#)).

Samba is the standard Windows interoperability suite of programs for Linux and Unix. Router app Samba handles creation of Samba server.

3. Web Interface

Once the installation of the module is complete, the module's GUI can be invoked by clicking the module name on the Router apps page of router's web interface.

Left part of this GUI contains menu with Status menu section, Configuration menu section and Information menu section. Customization menu section contains only the Return item, which switches back from the module's web page to the router's web configuration pages. The main menu of module's GUI is shown on Figure 2.
