## Auto Firmware/Config Update Enhancement

ICR-1601G

ICR-1601W

Enhanced function of Auto Firmware/Config Update:

- Added *config .ver example* file button to the *Auto Upgrade* page. This button can be used for .ver configuration file generation. The .ver file is required to make the upgrade function working properly and it must have the same file name and location as the configuration file saved on the HTTP(S)/FTP(S) server.
- Added options for updating the Firmware resp. the Config after the router reboot.
