## Explanatory Notes

**Temp** – Temperature at reference conditions.

**FR** – Failure rate: It's the rate of product failures expressed as a function of time.

**MTBF** – Mean Time Between Failures is a prediction of a power supply's reliability.

**SF** – Severity factor: Degree of severity in the event of failure.

**MTBF final** – MTBF including Severity factor.

**Op. time T** – Operating time of interest.

**Probability R(T)** – Probability that the product will operate for the Op. time T without a failure.

**R(T) in -25/+55C** – Probability in specified interval.
